

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [90] on page 21, with the following rewritten paragraph:

(1) An evaluation apparatus as shown in Fig. 8 was used for the evaluation test. The evaluation apparatus comprises a mass flow controller 50 for adjusting gas flow rate; nitrogen source 51 and butane source 52; a gas concentration sensor 53 to be evaluated; a measurement unit 54 (display unit) for displaying measurement value output from the gas concentration sensor; and a concentration analyzer 55 (e.g., an infrared concentration analyzer) for confirming concentration.
